Your Comments:

I fully support the cleanup plan as a means to better our community's ability to live alongside wildlife rather than in place of wildlife. I also fully support the effort as a veterinarian with strong ties to wildlife conservation and education. The cleanup is vital for the survival of not only our wildlife and the health of our ecosystem directly, but as human population continues to grow we need to increase our efforts for ecosystem and overall biosphere health. I support holding the organizations that have caused this pollution financially and legally responsible for the clean up effort.

I will volunteer as much time and services as I can. I also propose an educational/celebratory event to take this opportunity to educate the public (young generations) about the underlying problems which have lead to this pollution. i.e. sustainable living, human overpopulation and nourishing conscious evolution.

Please feel free to contact me directly with any questions or concerns.

Warm regards and thank you for your efforts,
